

Allgemeine Gold- und Silberscheideanstalt AG is part of Umicore, Brussels, a global materials technology group. It focuses on application areas where its expertise in materials science, chemistry and metallurgy makes a real difference. Umicore's overriding goal of sustainable value creation is based on an ambition to develop, produce and recycle materials in a way that fulfils its mission: materials for a better life. Its social commitment and innovative environmental approach have earned Umicore worldwide recognition; the corporation is among « World's Most Ethical Companies » (Ethisphere 2012). www.umicore.com

With its subsidiaries in Austria, The Netherlands, Switzerland, Thailand, North and South America Agosi represents the core of the Umicore Business Unit Jewellery & Industrial Metals. It provides a closed-loop concept of precious metals services, products and refining for the precious metals consuming industries. At its RJC-CoC certified sites in Pforzheim and Thailand, Agosi can offer CoC-conform, responsibly produced gold of conflict-free and certified origin. www.agosi.de. Our General Terms and Conditions apply. (www.agosi.de/download).

Our Sense of Responsibility

Agosi and the Responsible Jewellery Council
stand for a conflict-free supply chain

CoC fine gold with certified origin

printed on 100 % recycled paper

Gold alone cannot buy happiness

Agosi combines commercial success with social responsibility and a commitment to environmental protection. For this reason, we are a member of the RJC.

The demand for responsibly traded goods is increasing and influences a growing number of aspects in everyday life. Precious metals in jewellery and other applications are no exception. From this perspective, an environmentally correct approach, the protection of human rights and social responsibility are key factors in the entire manufacturing process.

At Allgemeine Gold- und Silberscheideanstalt AG, we are fully aware of this responsibility towards our customers, employees and the environment. On this basis, Agosi offers its support as your competent partner for precious metals.

With its closed-loop concept, Agosi specializes in the refining of secondary precious metals bearing materials. Consequently, we entered the strict certification process of the RJC, resulting in Agosi being the first German precious metals refiner to be granted the RJC Certificate – a seal of quality for our products and their morally and ethically correct background.

What is the RJC ?

The Responsible Jewellery Council, London, is an international not-for-profit organisation. It aims at strengthening consumer trust in the jewellery industry and its precious metals and precious stones supply chains. www.responsiblejewellery.com

What is the purpose of the RJC ?

- » Production methods that are ethics-based, socially oriented and environmentally beneficial
- » Implementation of these principles in the entire manufacturing process – from mine to retail

What is your RJC benefit ?

Simply said: responsibly produced jewellery.

For Agosi, the RJC principles are more than a mere orientation. They are fully applied according to the stringent RJC criteria, thus creating conditions that have an influence right up to the sales desk. With Agosi products and services you automatically profit from this RJC benefit.

RJC for your advertising activities

You can be sure to purchase morally and ethically correct products at Agosi, and you can be certain to offer to your customer a piece of jewellery that is manufactured according to these guidelines. You can prove the conflict-free origin of our material and its sourcing from Agosi, an RJC-certified refiner. For this purpose and/or your own advertising activities, our RJC certificate can be made available to you on demand.

Agosi invites you to make use of this competitive benefit which also demonstrates your own social and environmental commitment.

Agosi CoC fine gold

A sound base for your processing steps

As a certified member of the RJC, Agosi has gone one fundamental step further – the Chain of Custody (CoC) Certificate of the RJC.

This fundamental step has proven to be a further milestone for us. Agosi is the first German precious metals supplier to have been granted the CoC Certificate for a conflict-free supply chain of fine gold. Agosi can ensure the certified origin of its fine gold from ethically responsible sources. This is documented in corresponding paperwork - a CoC Transfer Document accompanies each delivery of CoC-conform material to Agosi's customers.

International standards

In fact, this claim is becoming increasingly important for the entire precious metals businesses as for the electrotechnical, IT- and investment industries. The customer demands information on the origin and processing of the material. The Agosi CoC Certificate also complies to the standards of other international organizations:

- » OECD / Gold Guidance
- » EICC (Electronic Citizenship Coalition) / conflict-free smelters programme (industrial applications)
- » LBMA / Gold Guidance Programme (Agosi is an accredited Good Delivery Refiner by the London Bullion Market Association)

Agosi products send yet another signal towards greater justice, more fairness and better transparency.

- » conflict-free
- » responsibly produced
- » of certified origin

Ask for Agosi CoC gold.

CoC-conform gold products with CoC Transfer Document:

- » semi-finished products (gold alloys)
- » investment products (fine gold bars)
- » fine gold (granules)

Responsibly produced jewellery: As your partner for precious metals, Agosi can provide you with its RJC Certificate.

Send us an email: customerservice@agosi.de

or send us this form by fax: +49 (0) 7231 960-119

Yes, I regularly purchase precious metals and products from certified refining at Agosi and would like to emphasize this in my advertising activities. Please send me the Agosi RJC Certificate (printed).
