AgosiRefining

At Agosi, your production scraps are in good hands

Our recycling management returns your scrap material to the cycle of your precious metals.

We process the material for you cost-effectively using state-of-the-art processes. You receive the value in the form you prefer: as fine metal or semi-finished products, as credit on your precious metals weight account, or as the equivalent in cash transferred to your bank account.

Agosi thereby completes the cycle with a fully comprehensive service package: we offer all services for the entire cycle of precious metals - a reliable single source.

Allgemeine Gold- und Silberscheideanstalt AG is part of Umicore, Brussels, a global materials technology group. It focuses on application areas where its expertise in materials science, chemistry and metallurgy makes a real difference. Umicore's overriding goal of sustainable value creation is based on an ambition to develop, produce and recycle materials in a way that fulfils its mission: materials for a better life. Its social commitment and innovative environmental approach have earned Umicore worldwide recognition; the corporation is among the „World's Most Ethical Companies“ (Ethisphere 2012). www.umicore.com

*With its subsidiaries in Austria and Thailand, North- and South America, Agosi represents the core of the Umicore Business Unit Jewelry & Industrial Metals. It provides a closed-loop concept of precious metals services, products and refining for the precious metals consuming industries. Its Pforzheim site is RJC-CoC certified and can offer responsibly produced CoC-gold, -platinum, -palladium and/or -rhodium of conflict-free origin. Agosi is also accredited according to the Responsible Gold and Responsible Silver Guidance by the London Bullion Market Association (LBMA). www.agosi.de
The current General Terms and Conditions apply.*

Refining Precious Metals
Scrap gold, scrap silver, precious metals bearing materials

AgosiRefining

At Agosi, your material is in safe hands

More than 2,000 tons of material bearing precious metals from more than 20,000 deliveries per year to our company speak in our favour.

With this refining capacity, Agosi ranks among the biggest refineries in Europe.

When processing your orders, Agosi gives top priority to working reliably and diligently.

Systematic refining ...

Each batch size is handled separately for each customer and for each material. Every step from homogenisation by melting or preparation, through sampling and analysis to accounting are carried out separately from other customers' orders, and are documented accordingly.

Every step within the process can be retraced. In line with our General Terms and Conditions, Agosi retains a sample of each scrap delivery after homogenisation.

... for your use

Depending on your requirements, the precious metals we recover are available to you in the following ways:

- » We credit the precious metals to your weight account
- » You sell your precious metals to Agosi at current market prices
- » You receive the precious metals physically (as bars, granules or semi-finished products, depending on your requirements)

Worldwide connections

Our metal trading department is always connected online with the most important international marketplaces and offers services such as the purchase and sale of precious metals, price hedging, financing, bank transfer payments and the physical delivery to a recipient of your choice. As our team is constantly available during trading hours, we are guaranteed to react quickly to movements on the market on the basis of current market rates for invoicing and settlement.

At www.agosi.de you can see detailed information on current prices, fixing rates and rate fluctuations for all common precious metals.

AgosiServices

Efficient recovery of precious metals

We would be happy to give you individual advice at your premises about possibilities to optimize your dealings with scraps and about their collection and transportation.

Together with you, our customer, Agosi experts will inspect your precious metals bearing materials and will make recommendations on the basis of your particular requirements. Together we will explore how best to sort the materials into cost-effective batch sizes and at what intervals they should be delivered to us.

Agosi stands for trust in the precious metals industry. Our business is based on transparency during all phases of refining. With short lead times and state-of-the-art technologies, Agosi is able to provide you with your precious metals in a timely manner.

AgosiCollection

Safe transport using the Agosi Safebag and Safebox

Our safety package not only offers your material physical protection against loss, but also means that your consignment has insurance cover.

We will provide you free of charge with the container best suited to your needs, depending on the type and the amount of material you have:

- » Safebag and Safebox (500 ml or 850 ml) for scrap
- » Sealable container capable of holding approx. 50l for sweeps
- » iron barred box with 500l capacity for bulk materials

We will send a freight carrier to your premises to collect your sweeps and your bulk materials. We can offer you security transportation or a courier service for scraps with gold content. Your consignment is of course insured with us during transportation.

Please call us or send your requirements.

AgosiPreciousMetalsServices

Certified Precious Metals

In the field of precious metals, Agosi plays an important role as a closed-loop refinery, manufacturer of semi-finished products and supplier of raw materials, namely gold, silver, platinum and palladium. Based on RJC certified Chain of Custody Standards for Gold and PGMs, Agosi is the first German precious metals company to offer a conflict-free delivery and production chain spanning raw materials to CoC fine metals or CoC semi-finished products. Agosi fulfils the requirements laid down by the Responsible Jewellery Council, the Conflict-Free Smelters List (RMI) and also the criteria of the Responsible Gold Guidance of the London Bullion Market Association (LBMA). In addition to that, Agosi is accredited according to LBMA Responsible Silver standards.

LBMA Accreditation

Allgemeine Gold- und Silberscheideanstalt AG is a member of the London Bullion Market Association and an accredited supplier of Good Delivery bars in fine gold (400 oz = approx. 12.5 kg) and fine silver (1000 oz = approx. 31.1 kg).

In order to meet the growing demand for silver as an investment product efficiently on a large scale, 1000 oz bars in fine silver are produced using an automated casting process.

Agosi's investment product programme does of course also include bars in smaller denominations. On request, the bars can be individually stamped, for example with the customer's logo.

AgosiBaseMetalServices

Agosi's Base Metal Services division is well equipped to turn valuable production scraps out of non-ferrous metals, steel and stainless steel back into high-quality raw products. We offer the complete recovery cycle starting with stamping scraps right through to materials for production and deliver high-quality base metal semi-finished products as strips, sheets, cuttings and wires and as crude and alloying metals - a wide range of materials, combined with recycling methods that are environmentally sound whilst maintaining high values.

Our Base Metals Services division is also certified as a waste management company. Modern recycling management means not only fast and flexible waste management services but also a processing system that is appropriate for the materials and that ensures sustainable recycling. This is all the more important since the base metals market is experiencing a significant increase in the prices for raw materials.
